

5 Charr. Semi-Rigid Hysteroscopy Instruments

**PATENT
PENDING**

The ergonomic handle design with special shaped rings enables effortless working.

The finger rest simplifies the control of the instrument.

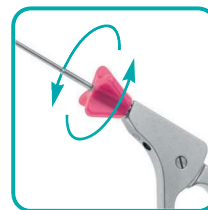

The innovative integrated automatic closing system* facilitates grasping by the use of a spring system.

We avoid bending of the instrument while using it in combination with a sheath resulting through a lightweight handle.

The lotus-effect of the surface enables an increase of the lifetime.

The 360° rotating mechanism allows an optimal position of the jaw.
